[2]National Research Council - Institute of Optics, Pozzuoli, Italy
[3]Polytechnic of Milan , Milano, Italy

[†]antonio.castrillo@unicampania.it

Abstracts must be submitted by sending an email to the Conference organizers (icsls2022@unicampania.it) using this template.

Figures of 300-dpi resolution can be included (see Fig.1, for example). Color figures will be converted to grey scale in the printed Book of Abstracts. Therefore, please verify that all figures continue to be easily readable after conversion. If you wish to include figures, do not forget to send us also the *.eps* graphics source file.

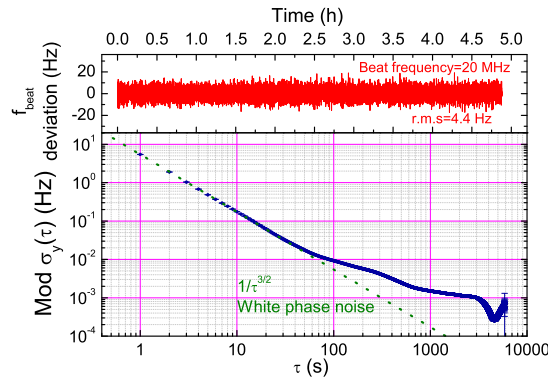

Figure 1: Example of figure.

Equations should be written using common LaTeX commands. Equation 1 is an example:

$$\int_{x_a}^{x_b} \frac{1}{x} dx = \ln x_b - \ln x_a = \ln\left(\frac{x_b}{x_a}\right). \tag{1}$$

References can also be included using the footnote command[1]. If the authors are more than six, references must be cited according to[2].

If necessary, a table can be inserted following the example of Table 1 reported hereafter.

Table 1: Table caption here.

Contribution	Type A (ppm)	Type B (ppm)
Reproducibility	22÷23	
Frequency scale		<2
Line center frequency		<10^{-4}
Overall combined uncertainty	23÷24	

Abstracts that do not respect the above guidelines will be returned to the corresponding author. Please, before submission, compile your abstract to carefully check if it appears like it should be. This can be done using a LaTeX software installed on your own computer or using an on-line free compiler (see for example the online collaborative LaTeX Overleaf editor at https://www.overleaf.com).
