

## Seminar Notice

### Bachelor's Degree in Data Analytics

Date: 6<sup>th</sup> November 2020

Time: 9:30 a.m. Amsterdam, Berlin, Rome, Stockholm, Vienna

Venue: Join Zoom Meeting

<https://zoom.us/j/99866128247?pwd=bWtFeDRBZ05yVFBRK2dkVnVYSHhTZz09>

Meeting ID: 998 6612 8247

Passcode: 1Tf7MB

Attendance: First and Second Year Data Analytics Courses

### Different approaches to monitor sustainability and gender Equality

**Dr Viktoriia Voitsekhovska (Associate Professor in Economics at Department of Economic of Enterprise, Lviv Polytechnic National University, Institute of Economics and Management) will present via video link, on different approaches to monitor sustainability and gender equality.**

Sustainability is biggest challenge of our generation. United Nations Sustainable Development Agenda 2030 and European Union put this phenomena at its core Goals and Politics, it includes 17 Goals and 169 Targets. Inequalities (gender, income and others) play an important role in implementing the UN Agenda 2030 and impact country overall performance: in its social, economic and environmental dimensions. The current crop of influential social scientists make innovative use of multiple data sources, its monitoring, organization and possible future use. The fundamental challenge here is to analyse country's progress in analysing data (for income and Gender Inequalities), reduce its complexity to a clear pattern, and to depict this graphically in a succinct way so in turn policymakers can do better decisions.
