

Course “Introduction to modern computing infrastructures”

Prof. Mauro Iacono (20h)

The course will introduce students to the main aspects of computing systems, starting from the elementary notions about computer architecture and examining all main architectural aspects and performance related issues of parallel and distributed systems, with special attention to facilities for scientific computing.

Lectures will take place on:

- Friday 10 February, 14-17, room G
- Tuesday 14 February, 14-17, room G
- Friday 24 February, 14-17, room G
- Tuesday 28 February, 14-17, room G
- Friday 3 March, 14-17, room G
- Friday 10 March, 14-17, room G
- Friday 17 March, 14-16, room G
